Gene Editing for Hemophilia B: Advances and Future DirectionsSteven W. Pipe

Q&AAll Speakers

Faculty

Craig M. Kessler

Georgetown University, Department of Medicine and Pathology - Washington, DC, USA

Prof. Dr. Craig Kessler is a Professor of Medicine and Pathology, and Medical Director of the Hemophilia Treatment Center and Coagulation Laboratory at the Georgetown University Medical Center, Washington, DC, USA. Dr. Kessler has been elected to a Mastership in the American College of Physicians, and is part of the Medical Advisory Board of the Platelet Disorder Support Association. He (co-)authored over 300 publications, was previously Editor-in-Chief of the Haemophilia Journal and is a past Chair of the Medical and Scientific Advisory Council for the National Bleeding Disorder Foundation. He has expertise in both bleeding disorders, combining patient care and clinical research, and hematologic malignancies.

Kate Khair

Haemnet - London, UK

Dr. Khair is Co-founder and Director of Research at Haemnet, London, UK, and Patron of the UK Haemophilia Society. After becoming a state-registered nurse, she acquired several credentials, including a PhD in health and social care. In the past, Dr. Khair was Chair of the Nurses Committee of the World Federation of Hemophilia. She is currently the Editor-In-Chief at the Journal of Haemophilia Practice. Dr. Khair has a long-standing interest in hemophilia and bleeding disorders outcomes research and is widely known for promoting the nurse's role in the multidisciplinary care team for hemophilia patients.

Steven W. Pipe

University of Michigan, Department of Pathology - Ann Arbor, MI, USA

Prof. Dr. Steven Pipe is Medical Director of the Special Coagulation Laboratory and the Pediatric Hemophilia and Coagulation Disorders Program at the University of Michigan, Ann Arbor, MI, USA, where he is also a Professor of Pediatrics and Pathology. Dr. Pipe was Chair of the Board of Directors of the American Thrombosis and Hemostasis Network and until recently, Chair of the Medical and Scientific Advisory Committee of the National Bleeding Disorders Foundation. His clinical interests include both thrombotic and bleeding disorders and he has been actively involved in clinical trials for novel hemophilia therapeutics, including gene therapy.
